

PHP LINK EXCHANGE v. 2.0

In the following pages you will find information and guiding about the PHP LINK EXCHANGE v. 2.0 and about how it works.

I. FRONT END

The front-end of the PHP LINK EXCHANGE v2.0 script looks as you see above. In the left you have the site logo (which can easily be changed from the admin control panel (back-end)); the menu and the content area (which includes the search form and the link categories).

The menu integrates the following links:

- Home: obviously this links to the index page of the link exchange generated by our script;
- Suggest URL: by following this link a simple visitor of your website can send his suggestions of URLs to be included in your Link Exchange section. Visitors can suggest URLs via a form that looks like below. Also via the form visitors can sign-up as referrers.

Suggest url

To quickly and easily set up your account with us, please fill out the form below. Thank you.
In order for us to approve your link, your site must have a link page and must not violate our link submission rules.

Your personal information

Full name*):

User login*):

E-mail*):

Password*):

Retype password*):

Website information

Website title*):

Website URL*):

Link page URL*):

link to us location

Short description*):

Category*):

Subcategory*):

Note: All fields marked with *) are mandatory!

Just fill in the fields with the appropriate information, make sure the back link URL is in placed on the suggested website and then click submit.

If the PHP Link Exchange is set up to wait for confirmation from admin before the suggested URL appears in front-end, then you'll have to wait till the admin checks and approves the suggested links. Otherwise, the suggested URL will be automatically shown.

- New sites: the new sites link will show a list of the recent websites submitted and approved by the admin. The period of time for which the links are considered “new” can be customized from the back-end;

New links

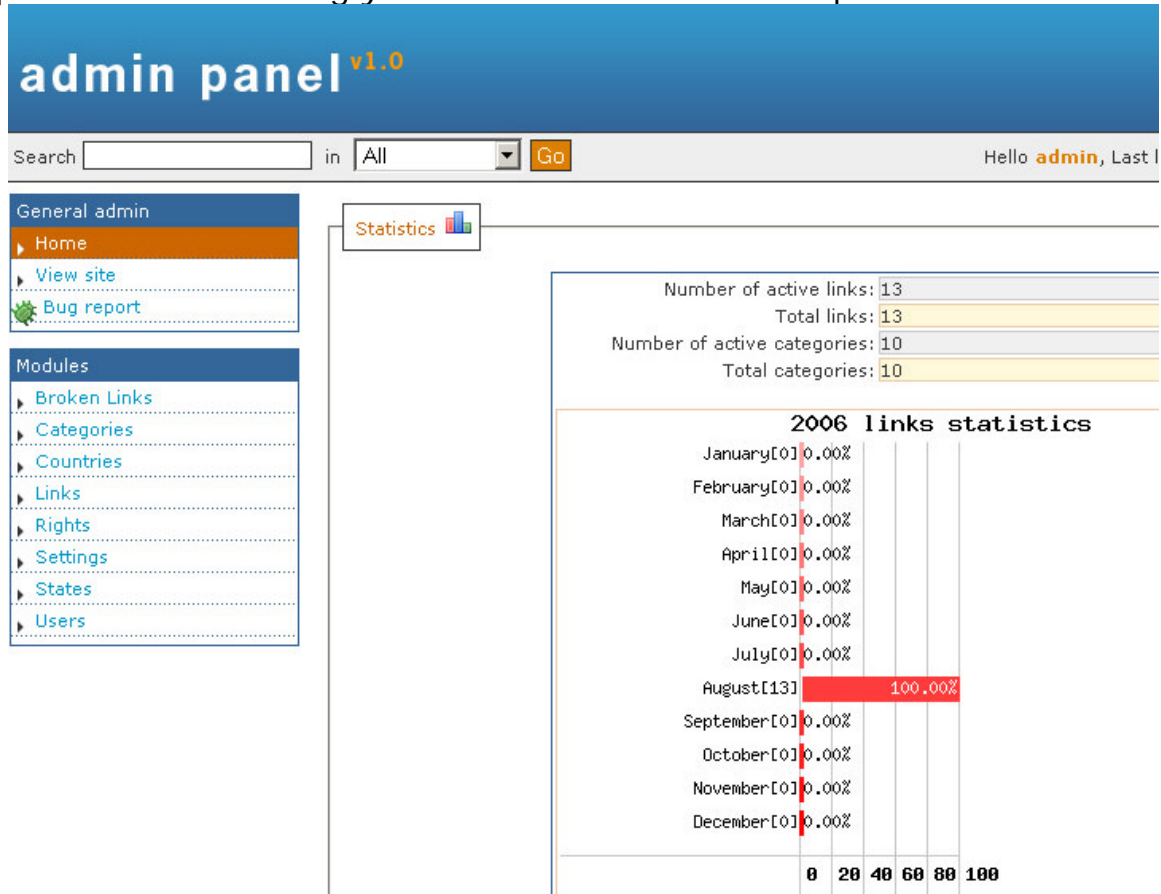

- ▶ **Thailanda**  **NEW** added Aug 2, 2006
The wonderful vacation destination of Thailanda. Come see the exotic beauty of Thailanda
<http://www.thailanda.com> | Report as broken link 
- ▶ **Heat**  **NEW** added Aug 2, 2006
The Heat official movie webpage, starring De Niro, Pacino and Val Kilmer. The website provides media files.
<http://www.heat.com> | Report as broken link 
- ▶ **Robert De Niro**  **NEW** added Aug 2, 2006
Robert De Niro's official webpage. The website provides all sorts of information and media files
<http://www.deniro.com> | Report as broken link 

- Referrer login: Fill in the login form to access the back-end or the admin control panel. Referrers can also access the back-end only that they have several restrictions comparing to the admin user;
- RSS Feed: our script has the feature of sending RSS feeds;
- Contact: contact the admin or the webmaster by filling in the contact form.

The **content** area includes the link categories and the sub-categories, revealing all the active and featured links. The visitors have the ability to report the broken links.

II. BACK END

In the back-end the admin can easily manage the link exchange site. Let's go through everything step by step. Below you can see a caption of the first thing you see in the admin control panel.

When you first login as the administrator of this script, in the index of the admin area you will see the navigation menu on the left and in the middle some statistic data, that shows in percentage the links submitted throughout the year. Also, there are some totals summarizing the number of active and total links, active and total categories.

General Admin

- Home: click this and you'll be taken to the index page of the admin area;
- View site: obviously, this links to the index of the front page;
- Bug report: is a nice feature of our script through which you can report to us any bug you might find. Describe as detailed as possible the problem you encounter and then click "Send Report". This will automatically send an email to our team and soon after that you will get a response;

Modules

- Broken Links: is the place where are listed all the links that have been reported by the visitors as being broken.

You are here: [Home](#)»[Broken links](#)»[View](#)

Broken links  

With selected do:

<input type="checkbox"/>	 Id	Title	Url	Back url	Options
<input type="checkbox"/>	4	Shania Twain	http://www.shaniatwain.com	http://www.shaniatwain.com/...	  

Legend:  =Edit record  =Delete record  =Details

From this you can check, edit, delete or find more info about the URL. Just follow drop down list or the small icons under the Options column in the table. Have in mind that the delete button only deletes the URL from this Broken Links list and for complete deletion of an URL you must use the delete button from the Links list.

- Categories: is the place where the admin can add or see the previous added categories. Also the categories can be edited/disabled or deleted;

Categories  

Parent*):

Title*):

Enable*):

Note:All fields marked with *) are mandatory!

Legend: =Yes =No

- Countries: is the place where the admin can add or see the previous added countries. Also the countries can be edited/disabled or deleted;
- Links: this section will show you the list of the links present in your link directory. From here you can add, edit, delete, enable/disable, set up any link as featured or un-featured. See below for the caption of this section:

- **Rights:** is the place where the admin can manage the privileges of the registered users. By default, there's only the admin rights listed, but you can easily add the privileges for referrers. See example below:

Rights  

Total

With selected do:

<input type="checkbox"/>	 Id	User level	Broken links	Categories	Countries	Links	Settings	States	Users	Rights	Options
<input type="checkbox"/>	1	admin	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	
<input type="checkbox"/>	2	referrer	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	<input type="checkbox"/> read <input type="checkbox"/> write <input type="checkbox"/> edit <input type="checkbox"/> delete	  

Legend:  =Edit record  =Delete record  =Details =allow =deny

- **Settings:** is the place where you customize a lot of aspects of your link exchange site. You can edit: admin number of records per page; front number of records per page; admin max link pages; new links time; back link URL; allow regional category; send email to admin; front link validation; front sub-categories; menu link color; menu link color hover; content top and bottom borders color; site logo; SMTP settings; Site Title, description and keywords. Next to each option you have a small question mark image. Hold your mouse pointer upon that image and details about the option will show.
- **States:** manage the country states. List, add, edit and delete;
- **Users:** manage the registered users. List, add, edit, enable or disable and delete.
